

Workplace COVID-19 Safety Risk Assessment

Assessor	Andrew Daffern
Job Title	Practice Manager
Assessment Date	4 June 2020
Business type / location:	Solicitors – York, Wetherby, Malton

Business Hazards	Potential Risks	Control Measures	Further Actions Required	
Infection Prevention, Cleaning	Infection Prevention, Cleaning and Staff Safety			
As the business rebuilds after lockdown and staff return to work the organisation must ensure their safety by making premises "COVID" secure – unsafe workplace premises raise the risks of virus transmission	There is a direct threat to staff health and wellbeing from transmission of the COVID-19 coronavirus while at work People can catch the virus from others who are infected in the following ways: virus moves from person-to-person in droplets from the nose or mouth spread when a person with the virus coughs or exhales the virus can survive for up to 72 hours out of the body on surfaces which people have coughed on etc. people can pick up the virus by breathing in the droplets or by touching contaminated surfaces and then touching their eyes or mouth	Ensure that the organisation complies with its duty to provide a safe and healthy workplace/working conditions for staff in the workplace during the coronavirus pandemic by: Circulating "COVID secure" coronavirus policies and safety procedures to all staff and managers; these set out how staff should behave and the precautions they must adopt during the pandemic to keep them safe Requiring staff to practice effective social distancing while in and around the workplace, while travelling to work and in all work business		

Ware & Kay 2020 Page 1 of 16

Managers should pass on and reinforce key Government public health messages to all staff:

temperature checks when you arrive at work to help identify potential symptoms at an early stage

cover the mouth and nose with a tissue or sleeve (not hands) when coughing or sneezing (Catch it, Bin it, Kill it)

put used tissues in the bin straight away

wash hands regularly with soap and water for at least 20 seconds (use hand sanitiser gel if soap and water are not available)

avoid close contact with people who are unwell

clean and disinfect frequently touched objects and surfaces

do not touch face, eyes, nose or mouth if hands are not clean.

In all departments, fully implement Public Health England (PHE) Guidance for Employers and Businesses on Coronavirus, including the following key safety precautions:

Keep local/departmental risk assessments under review to ensure that a safe place of work is maintained

Ware & Kay 2020 Page 2 of 16

		Consult with staff and staff	
		representatives – fully involve the	
		workforce at all stages of the	
		pandemic	
		panaonno	
		Make any adjustments to the	
		workspace/rotas/work patterns/	
		procedures necessary to facilitate	
		effective infection prevention and	
		social distancing at work	
		Follow government health and travel	
		advice	
		Provide hand sanitiser as required	
		Provide infection control personal	
		protective equipment (PPE) such as	
		gloves, masks and eye protection if	
		required in individual risk assessments	
		and method statements, e.g. cleaning	
		Display appropriate public health	
		posters and notices around the	
		workplace and on websites	
		Staff are not required to wear face	
		coverings while at work but may do so	
		if they wish	
Home Working, Hot-desking ar	d Equipment Sharing	ii tilo y wioli	
Home working, not-desking ar	iu Equipment Snarmy		
		I	
Staff working together in workplace		Homeworking could be adopted within	
premises inevitably raises the risk of	gathering in the workplace and of	the organisation as the preferred	
virus transmission.	transmitting the virus	method subject to the needs of the	
		business	
Hot desking and the sharing of			
equipment present hazards that raise		The following working arrangements	
the risk of virus transmission further		will be put into place to support	
		homeworking when necessary	

Ware & Kay 2020 Page 3 of 16

		Managers will plan for the minimum number of people needed on site to operate safely and effectively whilst maintaining effective business operations	
		Homeworking policies to be reviewed to ensure that sufficient support is provided to homeworkers	
		Managers should monitor the wellbeing of people who are working from home and put in place measures to support their mental and physical health and personal security	
		Arrangements should help homeworkers to stay connected to the rest of the workforce as appropriate	
		Hot-desking will not be generally supported at this time but homeworkers who do attend the office to work must bring with them their own mouse and keyboard	
		Equipment should not be shared between staff – limit use of high-touch equipment in the workplace, e.g. whiteboards, pens, printers etc.	
Workplace Social Distancing			
Effective social distancing is a key element in reducing the transmission of COVID-19	Social distancing refers to people being required to maintain a distance from each other of 2 meters, wherever possible.	Staff are required to practice effective social distancing while in and around the workplace, while involved in work activities and when travelling to and from work, whenever possible, by:	

Ware & Kay 2020 Page 4 of 16

Social distancing effectively puts people at a safe range from anyone coughing. The main route of virus transmission is through droplets exhaled or coughed by an infected person

Avoiding nonessential contact with others

Keeping a safe distance of at least 2 metres (about 3 steps) from others whenever possible

Avoiding physical contact (e.g. hugs, handshakes, etc.)

Adaptations to the premises to support social distancing should include:

A review of all work premises to identify suitable adaptations which will support social distancing

Offices and work spaces to be set up to support social distancing, e.g. layout changes, appropriate signage, stickers and floor markings to denote safe distances, etc.

Workstations and desks to be arranged with a minimum separation between them – where necessary screens will be fitted

Establishing maximum occupancy limits for offices and work areas

Reducing the need for staff to move around within the workplace

Adaptations to work processes to support social distancing will include:

Cancelling nonessential meetings

Ware & Kay 2020 Page 5 of 16

Holding essential meetings in well ventilated rooms with appropriate social distancing in place – limit numbers to essential members only and use phone/video conferencing, etc.

Replacing face-to-face meetings wherever possible with video conferencing, phone conferencing, etc.

Holding meetings outdoors

Providing hand sanitiser at meetings

Cancelling nonessential training and all face-to-face training / recruitment practices

Carrying out any essential training/ recruitment by using email/online elearning wherever possible rather than bringing people together face to face

Managers should display notices in all premises reminding staff of the key infection prevention requirements, including the need to maintain safe distancing

Where social distancing guidelines cannot be followed in full, in relation to a particular activity, managers must carry out further risk assessments and consider whether that activity needs to continue for the business to operate - where such activities need to continue appropriate mitigation methods should be put into place, such as:

Ware & Kay 2020 Page 6 of 16

		Increased hand washing Increased environmental cleaning	
		Keeping the activity time involved as short as possible	
		Reducing the number of people each person has contact with by using "fixed teams or partnering" (so each person works with only a few others)	
Higher Risk Areas of the Work	olace		
Some areas of the workplace may present a higher risk than others – this may include areas such as staff toilets, staff rooms and restrooms	Heavily used areas of the workplace are more likely to present an infection transmission risk Essential for staff to wash hands regularly but also that toilets are kept clean and free of coronavirus contamination A number of staff going to the toilet together may compromise their ability to comply with social distancing Increased risk of people coughing and touching door handles, taps and toilet flush handles	Ensure higher-risk high-traffic areas of the workplace are COVID-secure by applying appropriate safety precautions, including: Stressing the need for staff to follow good hygiene practice at all times while at work (i.e. regular handwashing, using tissues and disposing of them appropriately, etc.) Managers ensuring that adequate hand cleaning resources are provided; all staff toilets to be supplied with adequate supplies of hot water, liquid soap and paper towels Printing handwashing instructions / posters and displaying throughout workplace, especially in toilets	
		Limiting numbers of staff who can use high traffic areas such as corridors, stairs, toilets and restrooms at any one time to ensure social distancing	

Ware & Kay 2020 Page 7 of 16

Limiting lift occupancy

Monitor high-traffic area use and regulate access as necessary

Prioritise disabled use where necessary, e.g. disabled toilet use, use of lifts, etc.

Staggering breaks so that the staff rooms are not overloaded and limiting time in the staff room to 30 minutes

We could consider closing the staff rooms and kitchens

Establishing safe queuing systems by use of room occupancy limits and floor markings/signage, etc.

Placing 60% alcohol hand gels at convenient places around the workplace with instructions for use

Increasing environmental cleaning, especially in and around toilets and restrooms and staff rooms; special attention to be paid to frequently touched surfaces such as door handles, toilet flush handles, light switches, etc.

Increasing toilets/washrooms inspections to check for cleanliness/adequate stock of soap/toilet paper, etc.

Ware & Kay 2020 Page 8 of 16

		We would need to employ day time	
		cleaners in order to achieve the above	
		Where possible, providing paper	
		towels as an alternative to hand dryers	
		in handwashing facilities	
Vulnerable and Extremely Vuln	erable Staff		
Come stoff may have pre existing	Those who are algorified by DUE as	The following enfety and staff health	
Some staff may have pre-existing		The following safety and staff health	
medical conditions which render them	being at greater risk from COVID-19	arrangements should apply to staff who	
more vulnerable to the dangers of	include people in the vulnerable	are classified as vulnerable (moderate	
coronavirus infection.	(moderate risk) and extremely	risk) or extremely vulnerable (high-	
	vulnerable (high risk) categories	risk):	
	Mala and Landau to the State of		
	Vulnerable (moderate risk) people	Managers and human resources	
	include those who:	should identify and be aware of staff	
		who fall into vulnerable and extremely	
	are 70 or older	vulnerable categories so they can	
	_	ensure that they are given adequate	
	are pregnant	protection and support to enable them	
		to comply with government health	
	have a lung condition such as asthma,	recommendations	
	COPD, emphysema or bronchitis (not		
	severe)	No member of staff in the extremely	
		vulnerable "high-risk" category should	
	have heart disease, diabetes, chronic	be expected to come to work during the	
	kidney disease or liver disease (such	pandemic crisis or during recovery	
	as hepatitis)	from the lockdown - these staff should	
		be advised to follow government	
	are taking medicine that can affect the	medical advice and stay at home	
	immune system (such as low doses of		
	steroids) or	Extremely vulnerable "high-risk" staff	
		will be offered furlough arrangements -	
	are very obese	where it is possible or appropriate for	
		them to safely work from home without	
	Extremely vulnerable (high risk) people	risk this should be facilitated	
	include those who:		
		Staff in the vulnerable "moderate risk"	
	have had an organ transplant	category should be considered on a	

Ware & Kay 2020 Page 9 of 16

are having chemotherapy for cancer, including immunotherapy

are having an intense course of radiotherapy for lung cancer

have a severe lung condition (such as severe asthma or severe COPD)

are taking medicine that makes them much more likely to get infections (such as high doses of steroids)

have a serious heart condition and are pregnant

The following PHE advice applies:

Those in the "high risk" (extremely vulnerable) category are subject to special "shielding" arrangements — they are advised to self-isolate and not leave home for any reason or in accordance with current Government guidance.

Those in the "moderate risk" (vulnerable) category are advised to stay at home as much as possible - they can go to work if they cannot work from home

People in both categories are advised by the government to be particularly stringent in complying with social distancing requirements case by case basis - wherever possible they will be supported to work from home

Staff in the vulnerable "moderate risk category who cannot work from home and wish to return to work should be offered additional protection so that they can achieve effective social distancing

Managers should stay in touch with vulnerable or extremely vulnerable staff who are staying at home by phone to ensure they are well and to prevent them from feeling isolated

As they cannot leave their home at all, the organisation could help to provide additional support for any extremely vulnerable high-risk staff who may need it; this might include providing shopping or medicines where they are unable to gain support from elsewhere

All reviews of staff roles and safety should be non-discriminatory and take into consideration equality considerations and protected characteristics as defined under the Equality Act 2010, e.g. disabled staff

Reasonable adjustments must be made to avoid disabled workers being put at any disadvantage

Managers should refer to existing policies regarding new and expectant mothers, e.g. entitlement to

Ware & Kay 2020 Page 10 of 16

	Pregnant women are included in the "moderate risk" category as a precaution but are not considered by PHE to be more likely to get seriously ill from COVID-19	suspension on full pay if suitable safe roles cannot be found	
	There is some evidence that people from ethnic minority backgrounds are hit harder by COVID-19		
Staff Health and Staffing Levels	5		
Low staffing hazards due to high rates of staff sickness or staff having to self-isolate themselves at home or remain at home because they are "shielded"	Staff may get sick with coronavirus infection People who have symptoms must "selfisolate" at home for 7 days from the start of symptoms to prevent them from passing the infection on and contributing to the overload on the NHS Those who live with others and where one person has symptoms must selfisolate as a household for 14 days from the day when the first person in the house became ill. If anyone else in the household starts displaying symptoms, they need to stay at home for 7 days from when the symptoms appeared, regardless of what day they are on in the original 14-day isolation period Those who are considered extremely vulnerable are advised to "shield" themselves at home	The following safety arrangements should apply to staff health or staffing levels: Staff who are considered extremely vulnerable or high-risk should not be expected to attend for work in the workplace - where possible or appropriate they should be furloughed or supported to work from home Staff who are sick or self-isolating should phone immediately and inform their line-manager - on no account should they attend for work Make sure that communications go out that no member of staff should come to work if they are self-isolating or if they have COVID-19 symptoms or if they feel unwell Staff may be reallocated from nonessential parts of the organisation to essential functions or may be subject to furlough arrangements	

Ware & Kay 2020 Page 11 of 16

		Managers should consider temporary departmental closures or operational adjustments if staffing is reduced to unsafe levels	
Premises Access and Travel			
Staff who are required to attend for work must be given safe access to the workplace	Travel to and from work may lead to greater risk of virus transmission Public transport may be restricted in order to achieve social distancing on trains, buses, etc. Access to buildings may create a virus transmission risk if staff all seek entrance at once or are channelled through single points of entry Risks may be increased for disabled staff who may have reduced options for access	The following safety arrangements should apply to workplace access and travel arrangements: Ensure that sufficient access points to the workplace are provided so that staff do not congregate at entrances and exits Review disabled access policies and arrangements to ensure safe entrance or exit for disabled staff Use floor markings and signage at entrances and exits and introduce oneway flow systems at entry and exit points where appropriate Enable flexible/staggered working arrangements so that staff can avoid travelling at peak times or all arriving or leaving at the same time Provide hand sanitiser at entrances and exits Ask staff not to share cars and limit use of any work minibuses, etc. Support staff to walk or cycle to work wherever possible, e.g. providing safe bike storage, showers, lockers, etc.	

Ware & Kay 2020 Page 12 of 16

		·	
		Ask staff not to use public transport if at all possible – where they do use public transport they should conform to all requirements, e.g. wearing face coverings if required, social distancing, etc.	
		Don't leave personal belongings in the office. Take them home at the end of each day. E.g. coats, shoes, footwear, bags, ruck sacks etc.	
		In all cases non-essential travel for work purposes should be minimised	
Cases of Possible Infection On	-site		
People becoming unwell while on-site or a symptomatic person using a site	High risk of transmission	If a member of staff becomes unwell in the workplace with coronavirus symptoms (a new, continuous cough or a high temperature) they should be sent home and advised to follow government advice to self-isolate The following actions should be taken within the workplace: All surfaces that a symptomatic person has come into contact with must be cleaned and disinfected, especially objects visibly contaminated with body fluids and all potentially contaminated high contact areas such as toilets Public areas where a symptomatic individual has passed through and spent minimal time, such as corridors,	
		but which are not visibly contaminated with body fluids, can be cleaned thoroughly as normal	

Ware & Kay 2020 Page 13 of 16

Business Continuity		Cleaning staff should use disposable cloths or paper roll and a combined detergent disinfectant solution at a dilution of 1000 parts per million available chlorine Cleaning staff must wear appropriate PPE Waste from cleaning of areas where possible cases have been (including disposable cloths and tissues) should be immediately placed in the commercial waste bins		
Business Continuity				
Crisis management and business continuity hazards caused by the pandemic emergency		Managers should refer to business continuity policies and procedures After lockdown the following safety arrangements should be applied to establish business recovery: Establish overall coronavirus risk management team Ask all departments to review and refresh business continuity plans as necessary Devise appropriate business recovery plans and keep under constant review		
Information				
Hazards caused by lack of information or inaccurate information being circulated		After lockdown the following safety arrangements should be applied to		

Ware & Kay 2020 Page 14 of 16

		1	
	and also by misinformation, rumour and "fake news" or "myths". If these are allowed to gain traction within the organisation they can obscure and confuse vital health and safety measures.	mitigate risks caused by misinformation and "fake" news: To ensure the safety and wellbeing of staff business strategies must be based on accurate information and staff must be given consistent, simple and clear messages Management team to monitor official advice carefully and update all policies and procedures Managers to beware fake news and discourage the circulation of misinformation Keep staff informed - key messages include the need for unwell staff or homeworking staff to stay at home, for frequent handwashing and for social distancing	
Communication			
Threat to effective communications	The pandemic crisis threatens communications with clients/customers/suppliers – such communications are vital in the reestablishment of business activities and procedures after lockdown	After lockdown the following safety arrangements should be applied to mitigate risks to communication systems: Senior management to review all outward facing communications (e.g. on customer website, etc.) to ensure messages are consistent, clear and reflect the customer focused and socially aware values of the organisation Managers to revise communications	
		strategies and plans	

Ware & Kay 2020 Page 15 of 16

	1		
Cyber-security		Devise specific plans for how and how often to communicate with clients / customers / suppliers	
Cyber-security risks	Cyber-security threats often accompany a crisis, including computer viruses, phishing and scam emails and coronavirus related "ransomware" With the organisation and individual staff more reliant than ever on digital communications and the internet, and with more staff working from home and using a variety of digital devices, the need to ensure the security and function of our digital systems is more important than ever	The following safety arrangements should be applied to mitigate cyber risks: Review cyber security and surveillance infrastructure and ensure that all reasonable protection is in place Circulate warnings to staff and managers of any credible cyber threats, especially scam emails and text messages Ensure that staff working from home and using remote-working systems are covered by cyber-risk protections Ensure any homeworking arrangements maintain standards of data protection and IT security Ensure that existing cyber-security systems do not interfere with the availability of critical safety information and updates relating to coronavirus	

Ware & Kay 2020 Page 16 of 16
